

Bikram Brar

Technical Product Manager, AI

Product leader with 7+ years across business analysis, product management, and hands-on software building. I am strongest where user research, metrics, UX judgment, technical depth, and fast AI-assisted execution all need to stay connected.

Focus

- AI Product Manager roles where discovery, metrics, roadmap judgment, and execution speed matter.
 - Technical Product Manager roles where a product leader can prototype, code, and shorten feedback loops.
 - Product Lead roles focused on workflows, HCI, UX iteration, and human-agent product surfaces.
-

Experience

Songbird

Founder / Product Builder - Apr 2026 - Present

Building a local-first design canvas where humans and AI agents collaborate on the same product workflow through UI and CLI, then hand context to Codex for implementation.

Mysti.AI

Founder & CTO - Jan 2024 - Sep 2025

Built AI products from 0-to-1 across health, voice, and operations. Owned discovery, roadmap, design, engineering, pricing, and launch loops.

Odaia.AI

Senior Product Manager - Dec 2022 - Dec 2023

Led product work for AI-driven SaaS workflows. Partnered across engineering, data science, design, customers, and partners to turn ambiguous intelligence products into adopted workflows.

Gale Agency

Associate Manager, Technology - Dec 2020 - Nov 2022

Led product and delivery across customer-facing apps, loyalty systems, CRM implementations, and operational workflow modernization.

BMO Financial Group

Senior Business Analyst - Jun 2017 - Mar 2020

Worked on mobile product experiences, requirements, user research, agile delivery, metrics, and iteration cycles for high-trust consumer workflows.

Selected builds

- **Songbird:** local design canvas for humans and AI agents.
 - **Codex Chat:** local-first macOS Codex client.
 - **General Augment:** SDKs, CLI, examples, and agent integration guidance.
 - **VoiceCal:** AI receptionist for clinic and local-service workflows.
 - **Mysti:** personal health AI product.
 - **Starbeam:** enterprise alignment platform with background agents.
 - **Goodcommit:** AI-assisted Git commit utility.
 - **Capsule Memory:** open-source agent memory substrate.
 - **DealScan, Dayplan, RentPapers, Repoprompter:** additional product and developer-tool experiments.
-

Skills

Product: discovery, JTBD, metrics, iteration loops, roadmap strategy, prototyping, GTM, cross-functional leadership.

Technical: Swift, React, TypeScript, React Native, Node.js, Next.js, PostgreSQL, AWS, GCP, Azure.

AI: agentic workflows, RAG, memory, evals, guardrails, prompt systems, voice AI, design-to-code workflows.
